OFFICE OF FAIR HEARINGS

[REDACTED]

PETITIONER,

AHCA Case No.: 23-FH2004

vs.

AGENCY FOR HEALTH CARE
ADMINISTRATION,

RESPONDENT.

_____ /

FINAL ORDER

Pursuant to notice, the undersigned convened a telephonic Fair Hearing on the instant case on October 11, 2023, at 9:05 a.m. Eastern Standard Time ("EST").

APPEARANCES

For the Petitioner:

[REDACTED]

Petitioner's Authorized Representative

For the Respondent:

Suzanne Chillari
Medical/Health Care Program Analyst
Agency for Health Care Administration

STATEMENT OF ISSUE

The issue is whether Respondent proved by a preponderance of the evidence that Respondent's decision to terminate Petitioner's Behavior Analysis ("BA" or "ABA") services was correct.

PRELIMINARY STATEMENT

All parties and witnesses appeared telephonically. Petitioner's Authorized Representative and [REDACTED], [REDACTED] (" [REDACTED]"), appeared on behalf of Petitioner. Dunia Nunez ("Ms.

Nunez”), Petitioner’s Board Certified Behavior Analyst (“BCBA”), appeared as a witness for Petitioner.

Suzanne Chillari (“Ms. Chillari”), Medical/Health Care Program Analyst for the Agency for Health Care Administration (“Agency” or “AHCA”), appeared on behalf of Respondent. Dr. Alyssa Conway (“Dr. Conway”), Second Level Reviewer and BCBA-D for eQHealth Solutions Inc. (“eQHealth”), appeared as a witness for Respondent.

Melina, interpreter number 358934, appeared to offer translation services for the Petitioner. Valeria, interpreter number 3675252, appeared to offer translation services for Petitioner. Hector, interpreter number 395405, also appeared to offer translation services for the Petitioner

Prior to the hearing, Petitioner sent to the Office of Fair Hearings and Respondent a nineteen (19)-page evidence packet. The nineteen (19)-page evidence packet appears in the Office of Fair Hearings’ document management system as the file title “Emailed petitioner evidence 23-FH2004.pdf.pdf”. Absent an objection from the Respondent, the undersigned admitted the nineteen (19)-page evidence packet into evidence as Petitioner’s Composite Exhibit 1 (“PCE 1”).

Prior to the hearing, Respondent sent to the Office of Fair Hearings and Petitioner a three-hundred and ninety-eight (398)-page evidence packet and a forty-nine (49)-page evidence packet. The three-hundred and ninety-eight (398)-page evidence packet appears in the Office of Fair Hearings’ document management system as the file titles “[REDACTED] FH 10.11.2023 1-166.pdf”, “[REDACTED] FH 10.11.2023 167-360.pdf”, and “[REDACTED] FH 10.11.2023 361-398.pdf”. The forty-nine (49)-page evidence packet appears in the Office of Fair Hearings’ document

management system as the file title “Agency Evidence Legal Authorities 23-FH2004.pdf”. Absent an objection from the Petitioner, the undersigned admitted the three-hundred and ninety-eight (398)-page evidence packet into evidence as Respondent’s Composite Exhibit 1 (“RCE 1”) and the forty-nine (49)-page evidence packet into evidence as Respondent’s Composite Exhibit 2 (“RCE 2”).

FINDINGS OF FACT

1. Petitioner receives Medicaid services on a fee-for-service basis from the Agency. eQHealth is a Quality Improvement Organization contracted by the Agency to review prior authorization requests for services. *See* page 2 of RCE 2.

2. Petitioner is [REDACTED]. *See* page 21 of RCE 1. Petitioner is diagnosed with [REDACTED]. *Id.*

3. Petitioner requested continuation of BA services; specifically, 3,120 units of code 97153; 208 units of code 97155; and 208 units of code 97156. In a Notice of Outcome (“NOO”), dated July 28, 2023, Respondent terminated Petitioner’s ABA services. *Id.* at 28. The NOO explained the basis for the termination as follows:

[T]he requested services are not medically necessary under the following standard(s):

Consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational.

The NOO further provided:

PR Clinical Rationale – Denial: According to the Florida Medicaid State Plan (Appendix 9.3.b), the data provided must show evidence that the frequency of the maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan. The recommendations for procedural modifications include: additions/changes to treatment plan to impact behaviors

targeted for reduction. Procedural modifications should include one or more of the following: antecedent manipulation modifications, modifications of prompting procedures used in acquisition, modifications in consequence-based strategies- - ones that either reduce maladaptive behavior or reinforce replacement behavior (e.g., manipulation of reinforcement schedules, switch to a different decelerative procedure), or if lack of progress was due to therapist error (e.g., poor data collection or poor training on intervention methods), how you will address human error. The provider has not addressed the lack of progress during the last observation period and did not amend the treatment plan in relation to the lack of progress or the changes were not sufficient. The information submitted does not meet standards of care within the field of behavior analysis. This request is denied.

...

Pages 28 – 29 of RCE 1.

4. Petitioner requested reconsideration of the Respondent’s decision. In a Notice of Reconsideration Determination (“NRD”), dated August 17, 2023, Respondent upheld its decision. *Id.* at 40 – 41. The NRD explained the basis for the decision as follows:

PR Recon Determination: At reconsideration all documents were carefully reviewed.. According to the Florida Medicaid State Plan (Appendix 9.3.b), the data provided must show evidence that the frequency of the maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan. The recommendations for procedural modifications include: additions/changes to treatment plan to impact behaviors targeted for reduction. Procedural modifications should include one or more of the following: antecedent manipulation modifications, modifications of prompting procedures used in acquisition, modifications in consequence-based strategies- - ones that either reduce maladaptive behavior or reinforce replacement behavior (e.g., manipulation of reinforcement schedules, switch to a different decelerative procedure), or if lack of progress was due to therapist error (e.g., poor data collection or poor training on intervention methods), how the provider will address human error. The recommendations are insufficient to support continued care.

...

Pages 40 – 41 of RCE 1.

5. On August 16, 2023, Petitioner requested a Fair Hearing to challenge the termination of ABA services. *Id.* at 8. On September 8, 2023, the undersigned issued an Order Scheduling Fair

Hearing by Telephone and Prehearing Instructions, setting the hearing for October 11, 2023, at 9:00 a.m. EST. *Id.*

6. Dr. Conway is a Board Certified Behavior Analyst at the doctoral level. Dr. Conway testified to the following at the Fair Hearing:

- a. Petitioner has been participating in BA services since [REDACTED], and has been with the current provider since [REDACTED]. Petitioner is still engaging in multiple severe behaviors hundreds of times per week after multiple years of treatment.
- b. The data points for all maladaptive behaviors throughout the authorization show a level trend with no changes. *See* pages 323-327 of RCE 1. There is no variability between weeks of data. It is expected that the behaviors will decrease, and the line will trend downward. The first graph indicates that [REDACTED] still occurs at around [REDACTED] per week. *Id.* at 323. The graph for [REDACTED] exhibits a level trend line with minimal to no progress. *Id.* [REDACTED] still occurs at around [REDACTED] per week after [REDACTED] of treatment. *Id.* The graph for [REDACTED] exhibits a level trend line and no progress. *Id.* There is no variability in the data, and the behavior still occurs at between [REDACTED] per week. *Id.*
- c. The graphs for [REDACTED], [REDACTED], and [REDACTED] depict level trends, with each behavior occurring at the same or at a similar rate to the beginning of the authorization. *Id.* at 324. This indicates no progress and does not meet standards

of care within the field of applied behavior analysis. [REDACTED] still occur at over [REDACTED] per week. *Id.* [REDACTED] occurs at around [REDACTED] per week. *Id.* [REDACTED] still occurs at between [REDACTED] per week. *Id.*

d. The graphs for [REDACTED], [REDACTED], and [REDACTED] show level trends with no progress. *Id.* at 325. Petitioner is engaging in these behaviors at the same level as the beginning of the authorization. *Id.* [REDACTED] still occurs at [REDACTED] per week. *Id.* [REDACTED] still occurs between [REDACTED] and [REDACTED] per week. *Id.* [REDACTED] still occurs between [REDACTED] per week. *Id.*

e. The graph for [REDACTED] exhibits a slight increase in behavior from the beginning of the authorization. *Id.* at 326. [REDACTED] occurs between [REDACTED] per week. *Id.* The graphs for [REDACTED] and [REDACTED] show level trends with no progress. *Id.* [REDACTED] occurs around [REDACTED] per week. *Id.* [REDACTED] still occurs between [REDACTED] and [REDACTED] per week. *Id.*

f. The graph for [REDACTED] exhibits level trends and no progress. *Id.* at 327. [REDACTED] still occurs between [REDACTED] and [REDACTED] per week. *Id.* The behavior of [REDACTED] occurs over [REDACTED]-times per week. *Id.* Each maladaptive behavior shows no progress throughout the authorization. Petitioner has participated in BA

services for over [REDACTED]. To meet the standard of care, more progress and additional modifications are expected.

- g. Each caregiver goal began in [REDACTED]. *Id.* at 337-339. The performance of all caregiver goals is still below [REDACTED] *Id.* The graphs for the RBT indicate that the RBT is performing at between [REDACTED] [REDACTED]. *Id.* at 341. This indicates that the lack of progress is not a training issue, but rather a problem with the interventions and treatments being implemented.
- h. Each replacement goal shows level trends with minimal to no progress since the baseline date in [REDACTED]. Petitioner has been working on the same goals since [REDACTED]. The maximum performance for [REDACTED] during this authorization was between [REDACTED] *Id.* at 384. The graph for [REDACTED] depicts level trends with performance around [REDACTED] which is lower than chance levels. *Id.* To meet the standard of care within ABA, strategies and modifications must be implemented throughout treatment to increase response to treatment when performance is below standard.
- i. The graphs for [REDACTED] and [REDACTED] depict level trends and no progress. *Id.* at 385. Performance is between [REDACTED] [REDACTED] for each skill. *Id.* The graphs for [REDACTED] and [REDACTED] depict level trends and no progress, with performance between [REDACTED]. *Id.* at 386. The graphs for

[REDACTED] and [REDACTED] depict level trends, no progress, and no variability in data. *Id.* at 387. Performance is again between [REDACTED]. *Id.* There is no progress for any remaining replacement goals. *Id.* at 388-390. This treatment does not meet medical necessity criteria.

7. [REDACTED] is the [REDACTED] of Petitioner. [REDACTED] testified to the following at the Fair Hearing:

a. [REDACTED] stated Petitioner was making progress until [REDACTED] had an accident, after which there was not time for therapy. [REDACTED] does not want services to be terminated.

8. Ms. Nunez is Petitioner's Analyst. Ms. Nunez testified to the following at the Fair Hearing:

a. Petitioner began ABA services in [REDACTED]. Petitioner has had the same provider since [REDACTED]. Ms. Nunez stated Petitioner had intense maladaptive behaviors that have lowered in percentage. Ms. Nunez stated there was considerable improvement since [REDACTED] until stagnation of this last period. Ms. Nunez stated this stagnation may be due to environmental factors.

b. Ms. Nunez stated there have been three evaluations of the treatment plan, and that there have been modifications made at each evaluation to improve the maladaptive behaviors. In the first treatment plan, Ms. Nunez stated that three new interventions were introduced. In [REDACTED], Ms. Nunez stated that three new interventions were added and two replacement programs were

discontinued. Ms. Nunez stated that, currently, six interventions are included and five maladaptive programs have been removed.

- c. Ms. Nunez stated that [REDACTED]'s accident precluded [REDACTED] assistance with the program. Ms. Nunez stated that [REDACTED]'s health has improved and [REDACTED] is willing to help with the program.

CONCLUSIONS OF LAW

9. The Agency's Office of Fair Hearings has jurisdiction over the subject matter of this proceeding and the parties pursuant to section 409.285(2), Florida Statutes (2019). This order is the final administrative decision of AHCA under section 409.285(2)(a).

10. This hearing was held as a *de novo* proceeding pursuant to Fla. Admin. Code R. 59G-1.100(17)(b).

11. Because Respondent terminated a previously approved service, Fla. Admin. Code R. 59G-1.100(17)(g) assigns the burden of proof to the Respondent. The standard of proof in an administrative hearing is a preponderance of the evidence. The preponderance of the evidence standard requires proof by "the greater weight of the evidence" (Black's Law Dictionary at 1201, 7th Ed.)

12. The Florida Medicaid Behavior Analysis Services Coverage Policy (October 2017) ("BA Policy"), incorporated by reference in Fla. Admin. Code. R. 59G-4.125, governs BA services available under Florida Medicaid. The BA Policy provides as follows:

1.0 Introduction

Behavior analysis (BA) services are highly structured interventions, strategies, and approaches provided to decrease maladaptive behaviors and increase or reinforce appropriate behaviors.

...

1.4.5 Medically Necessary/Medical Necessity

As defined in Rule 59G-1.010, F.A.C.

...

4.0 Coverage Information

4.1 General Criteria

Florida Medicaid covers services that meet all of the following:

- Are determined medically necessary
- Do not duplicate another service
- Meet the criteria as specified in this policy

4.2 Specific Criteria

Florida Medicaid covers the following BA services in accordance with the applicable Florida Medicaid fee schedule(s), or as specified in this policy:

4.2.1 Behavior Assessment

One per fiscal year, per recipient, when completed within 30 days of the start of the assessment.

4.2.2 Behavior Analysis

Up to 40 hours per week, per recipient, consisting of services identified on the recipient's behavior plan in order to reduce maladaptive behaviors and to restore the recipient to his or her best functional level. Services include:

- Implementing behavior analysis interventions, and monitoring and assessing the recipient's progress towards goals in the behavior plan
- Behavior analysis interventions, for example, discrete trial teaching, task analysis training, differential reinforcement, non-contingent reinforcement, conducting task analyses of complex responses, and teaching using chaining, prompting, fading, shaping, response cost, and extinction
- Training the recipient's family, caregiver(s), and other involved persons on the implementation of the behavior plan and intervention strategies (the recipient must be present when clinically appropriate)

...

4.3 Early and Periodic Screening, Diagnosis, and Treatment

As required by federal law, Florida Medicaid provides services to eligible recipients under the age of 21 years, if such services are medically necessary to correct or ameliorate a defect, a condition, or a physical or mental illness. Included are diagnostic services, treatment, equipment, supplies, and other measures described in sectioned 1905(a) of the Social Security Act, codified in Title 42 of the United States Code 1396d(a). As such, services for recipients under the age of 21 years exceeding the coverage described within this policy or the associated fee schedule may be approved, if medically necessary. For more information, please refer to Florida Medicaid's General Policies on authorization requirements.

13. Appendix 9.0 of the BA Policy provides Review Criteria for Behavior Analysis Services.

These Review Criteria state as follows:

Review Criteria for Behavior Analysis Services

Behavior analysis (BA) services are considered as either the treatment of choice or as an adjunct treatment modality for a variety of conditions and disorders where maladaptive behaviors are part of the recipient's clinical presentation, including behavioral manifestations of diagnoses such as Autism Spectrum Disorder and other behavioral health conditions.

Critical Elements Necessary for ANY Type of Behavior Analysis Service:

The following critical elements **MUST** be satisfied to qualify for BA services:

- a. Eligibility – The recipient must meet all criteria for BA services as outlined in the Behavior Analysis Services Coverage Policy, Rule 59G-4.125, F.A.C.
- b. Medical necessity – The recipient must meet medical necessity criteria as outlined in Rule 59G-1.010, F.A.C.
- c. The recipient currently engages in maladaptive behaviors
- d. These maladaptive behaviors interfere with the recipient's daily functioning

1. Criteria for Initial Behavior Analysis Assessment - BOTH of the following **MUST** be satisfied:

- a. **ALL** critical elements are met
- b. Provide submits a valid written physician's order as stipulated in the Behavior Analysis Services Coverage Policy, Rule 59G-4.125, F.A.C.

2. Criteria for Behavior Analysis Services and Reassessments – ALL of the following **MUST** be satisfied:

- a. **ALL** critical elements are met
- b. An assessment or, if applicable, a reassessment, authored by a lead analyst, is provided. An assessment of the maladaptive behavior(s) is a necessary element of the process of identifying the frequency and magnitude of the behaviors as well as the variables associated with the occurrence of the maladaptive behavior(s). This helps in defining what are the functional consequences of the problem behavior(s) so that an adequate behavior plan can be implemented. This (re)assessment **MUST** include, at a minimum, **ALL** of the following:
 - i. A clear operational description of the maladaptive behavior(s)
 - ...
- c. A behavior plan authored or updated by a lead analyst. The behavior plan is the cornerstone of the delivery of behavior analysis services and it is based on the information obtained in the assessment. It proposes specific interventions to reduce or eliminate the maladaptive behavior. These interventions take into consideration the variables, both present before the behavior, as well as after the behavior, that influence the occurrence of the maladaptive behavior(s). This plan also includes

replacement appropriate behaviors for the recipient to engage in instead of the maladaptive behaviors in order to obtain the same function. The plan must be detailed enough to warrant the requested services and include mechanisms to monitor its effectiveness. This **MUST** include, at a minimum, **ALL** of the following:

- i. Observable and measurable descriptions of the maladaptive behavior(s)
- ii. Identified function of the maladaptive behavior(s) behavior as a result of the assessment or reassessment conducted
- iii. Goals and strategies for changing the maladaptive behavior(s)
- iv. Written detailed description of when, where, and how often these goals will be addressed and proposed strategies will be implemented
- v. System for monitoring and evaluating the effectiveness of the plan
- vi. Safety and crisis plan, if applicable
- vii. Summary and recommendations
- viii. Discharge criteria
- ix. Transition plan (if applicable)

NOTE: Although the assessment and behavior plan were addressed separately in section 2, both of them can be submitted as a single document.

3. Criteria for Continuation of Treatment at the Present Level and/or Using Current Methods: Providers must ensure that ALL of the following criteria are met to request continuation of treatments at the present level or using the current methods. If criteria for 3a is met, but criteria for 3b and/or 3c are not met, then a reduction of the treatment level and/or change of treatment methods may be warranted.

- a. ALL criteria listed in 2a, 2b, and 2c regarding critical elements, assessment or reassessment, and behavior plan, are met.
- b. The data provided must show evidence that the frequency of the maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan.
- c. The level of functional impairment justifies continuation of BA services. The reviewer utilizes the information provided below as a guide as it relates to the level of functional impairment as expressed through the following behaviors:
 - i. Safety – aggression, self-injury, property destruction, elopement
 - ii. Communication – problems with expressive/receptive language, poor understanding or use of non-verbal communications, stereotyped, repetitive language
 - iii. Self-stimulating, abnormal, inflexible, or intense preoccupations

- iv. Self-care – difficulty recognizing risks or danger, grooming, eating, or toileting
- v. Other – behaviors not identified above

14. States must provide Early and Periodic Screening, Diagnostic, and Treatment (“EPSDT”) services to Medicaid-eligible children under age 21 when requested under the Medicaid state plan. *See* 42 U.S.C. § 1396a(a)(43); 42 U.S.C. § 1396d(a)(4). According to 42 U.S.C. § 1396d(r)(5), EPSDT services mean, in relevant part, the following items and services:

Such other necessary health care, diagnostic services, treatment, and other measures described in subsection (a) of this section to correct or ameliorate defects and physical and mental illness and conditions discovered by the screen services, whether or not such services are covered under the state plan.

15. Petitioner is under age 21, and therefore EPSDT applies to his request for services. However, a state may place medical necessity limitations on EPSDT services. *See* 42 C.F.R. §§ 440.230(a), (b), (d). Fla. Stat. § 409.905(2) limits EPSDT services with a medical necessity standard:

The [Agency] shall pay for early and periodic screening and diagnosis of a recipient under age 21 to ascertain physical and mental problems and conditions and all services determined by the agency to be medically necessary for the treatment, correction, or amelioration of these problems and conditions, including personal care, private duty nursing, durable medical equipment, physical therapy, occupational therapy, speech therapy, respiratory therapy, and immunizations.

16. The Definitions Policy, incorporated by reference in Fla. Admin. Code R. 59G-1.010, defines “Medically Necessary” or “Medical Necessity” as follows:

The medical or allied care, goods, or services furnished or ordered must meet the following conditions:

- Be necessary to protect life, to prevent significant illness or significant disability, or to alleviate pain
- Be individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness or injury under treatment, and not in excess of the patient’s needs

- Be consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational
- Be reflective of the level of service that can be safely furnished, and for which no equally effective and more conservative or less costly treatment is available statewide
- Be furnished in a manner not primarily intended for the convenience of the recipient, the recipient's caretaker, or the provider

The fact that a provider has prescribed, recommended, or approved medical or allied care, goods, or services does not, in itself, make such care, goods or services medically necessary or a medical necessity or a covered service.

17. The Florida Medicaid Authorization Requirements Policy ("Authorization Policy"), incorporated by reference in Fla. Admin. Code R. 59G-1.053, provides as follows:

3.2.1 Continued Authorization Requests

The QIO shall not deny or reduce the amount, frequency, or duration of a service that is already being provided, unless:

- The reduction is to correct for factual error or omissions in prior certifications.
- There is a documented improvement in the recipient's medical condition.
- There is a documented change in the recipient's circumstances.
- The reviewing physician determines the recipient will not gain any additional benefit by continuing services at the current level.

18. In the instant case, Respondent terminated Petitioner's ABA services. See ¶ 3. In the NOO dated July 28, 2023, Respondent explained that continuing services at the prior level was not medically necessary, specifically, that it did not meet the requirement that services must be "consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational." *Id.* Respondent further explained that "the information submitted does not meet standards of care within the field of behavior analysis." *Id.*

19. As provided by the EPSDT requirements, the recipient must meet the medical necessity criteria as outlined in Fla. Admin. Code R. 59G-1.010. As provided in section 2.83 of the Definitions Policy, a component of medical necessity is that services must be “consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational.” As shown by the record, Petitioner is still engaging in multiple severe behaviors hundreds of times per week after multiple years of treatment. See ¶ 6. Dr. Conway testified that the data points for all maladaptive behaviors throughout the authorization show a level trend with no changes. *Id.* Dr. Conway also stated that each maladaptive behavior shows no progress throughout the authorization, as well as that more progress and additional modifications are expected after [REDACTED] of therapy in order to meet standards of care within the field of behavior analysis. *Id.* Dr. Conway also testified that the performance of all caregiver goals is still below thirty percent (30%), although goals began in [REDACTED]. *Id.* Furthermore, each replacement goal shows level trends with minimal to no progress since the baseline data in [REDACTED]. *Id.* Dr. Conway asserted that the high performance of the RBT indicates that the lack of progress is not a training issue, but rather a problem with the interventions and treatments being implemented. *Id.* As Petitioner has not made substantial improvements, the record shows that Petitioner will not gain any additional benefit by continuing services at the current level. In all, Respondent demonstrated that the provider was not rendering services “consistent with generally accepted professional medical standards”.

20. As QIO for the Agency, eQHealth is authorized to terminate services when “the reviewing physician determines the recipient will not gain any additional benefit by continuing services at the current level.” See ¶ 17. As discussed, *supra* ¶ 19, Petitioner has not made progress in

reducing ■■■ maladaptive behaviors, nor in improving ■■■ replacement behaviors. Here, Petitioner's lack of progress is well documented.

21. Upon consideration of the testimony provided, evidence submitted, and applicable polices, the undersigned concludes that Respondent proved by a preponderance of the evidence that the termination of ABA services was necessary. Looking at all the evidence relevant to the particular needs of Petitioner, Respondent has demonstrated that the previously authorized services with this provider, based on the treatment plan at issue in this case, are not necessary to correct or ameliorate a defect or a physical and mental illness or condition. Accordingly, Respondent proved by a preponderance of the evidence that Respondent's termination of ABA services was correct.

IT IS HEREBY ORDERED AND ADJUDGED THAT:

Respondent's termination of ABA services is **AFFIRMED**. Petitioner's appeal based on Respondent's termination is **DENIED**.

DONE and **ORDERED** this 14th day of November, 2023, in Tallahassee, Leon County, Florida.
