OFFICE OF FAIR HEARINGS

[REDACTED],

PETITIONER,

AHCA Case No.: 23-FH2100

vs.

AGENCY FOR HEALTH CARE
ADMINISTRATION,

RESPONDENT.

_____ /

FINAL ORDER

Pursuant to notice, the undersigned Hearing Officer convened a telephonic Fair Hearing on the instant case on October 13, 2023, at 9:05 a.m. EST.

APPEARANCES

For the Petitioner:

[REDACTED]

Petitioner's Authorized Representative

For the Respondent:

Diana Hearod
Medical Health Care Program Analyst
Agency for Health Care Administration

STATEMENT OF ISSUE

The issue is whether Respondent proved by a preponderance of the evidence that Respondent's decision to terminate Petitioner's behavior analysis ("BA") services was correct.

PRELIMINARY STATEMENT

All parties and witnesses appeared for the scheduled Fair Hearing telephonically.

[REDACTED] (" [REDACTED] "), Petitioner's Authorized Representative and guardian, appeared for the Fair Hearing on behalf of Petitioner, provided testimony, and did not call any

witnesses. Lien Fustes Ramirez, Board Certified Behavior Analyst (“BCBA”) with [REDACTED] [REDACTED]. (“Provider”), appeared for observational purposes.

Diana Hearod, Medical Health Care Program Analyst for the Agency for Health Care Administration (“Agency” or “AHCA”), appeared for the Fair Hearing as the representative for Respondent. Dr. Kathy Hurley (“Dr. Hurley”), a Board-Certified Behavior Analyst at the doctoral level (“BCBA-D”) for eQHealth Solutions and State of Florida Licensed Mental Health Counselor, appeared for the Fair Hearing as a witness for Respondent.

Petitioner did not introduce any exhibits at the Fair Hearing. Prior to the Fair Hearing, Respondent filed with the Office of Fair Hearings and sent to Petitioner a three hundred and thirty-four (334)-page evidence packet. The evidence packet appears in the Office of Fair Hearings’ case management system as “[REDACTED] FH 10.13.2023 1-116.pdf,” “[REDACTED] FH 10.13.2023 117-159.pdf,” “[REDACTED] FH 10.13.2023 160-197.pdf,” “[REDACTED] FH 10.13.2023 198-271.pdf,” “[REDACTED] FH 10.13.2023 272-334.pdf.” Without objection, the evidence packet was admitted into evidence as Respondent’s Composite Exhibit 1.

Prior to the Fair Hearing, Respondent filed with the Office of Fair Hearings and sent to Petitioner a forty-nine (49)-page evidence packet. The evidence packet appears in the Office of Fair Hearings’ case management system as “23-FH2100_BA AHCA PKT_49pgs_[Petitioner’s name].PDF.” Without objection, the evidence packet was admitted into evidence as Respondent’s Composite Exhibit 2.

FINDINGS OF FACT

1. Petitioner receives Medicaid services on a fee-for-service basis from the Agency. eQHealth is a Quality Improvement Organization contracted by the Agency to review prior authorization requests for services. See Respondent’s Composite Exhibit 2 at page 2.

2. Petitioner is [REDACTED]. See Respondent’s Composite Exhibit 1 at page 16. The Behavior Analysis Assessment/Behavior Intervention Plan (“Treatment “Plan”), identified the following maladaptive behaviors: [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], and [REDACTED] (“[REDACTED]”).
Id. at 259.

3. Petitioner requested the continuation of the following BA services: 3,120 units (30 hours per week) of code 97153, 12 units (3 hours per week) of code 97155, and 8 units (2 hours per week) of code 97156 for the certification period of July 18, 2023, through January 13, 2024. *Id.* at 332. On July 24, 2023, Respondent sent Petitioner’s Provider a Request for Additional Information letter. *Id.* at 45-46. Specifically, the letter requested evidence concerning Petitioner’s lack of progress on stated goals, clarification of operational definitions, and removal of procedures that are inconsistent with the practices of applied behavior analysis (“ABA”). *Id.*

4. On August 3, 2023, Respondent issued a Notice of Outcome (“NOO”), terminating Petitioner’s BA services. *Id.* at 30-32. The NOO explained the basis for the termination as follows:

[T]he requested services are not medically necessary under the following standard(s):

Consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational.

...

The NOO further provided:

Submitted information does not support the medical necessity for requested frequency and/or duration.

PR Clinical Rationale – Denial: There are behaviors listed for decrease and goals for increase that do not meet medical necessity criteria. All goals must significantly interfere with normal functioning by threatening access to typical environments and negatively affects activities of daily living. The goal for “[REDACTED]” (page 46) as written, does not meet the standards of Applied Behavior Analysis. They may include components that are either mentalistic, not objectively defined, are not functionally equivalent to the behavioral assessment results provided for the maladaptive behaviors targeted for reduction, cognitive behavioral therapy unproven/investigational strategies. The provider was requested to revise the plan. The goal remains in the plan. This request is denied.

Id. at 30-31.

5. Petitioner requested reconsideration of the Respondent’s decision. On August 25, 2023, Respondent issued a Notice of Reconsideration Determination (“NRD”) upholding its decision. *Id.* at 23-24. The NRD states, in pertinent part as follows:

Specifically the services must be:

Consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational.

...

At reconsideration all documents were carefully reviewed. According to the Florida Medicaid State Plan (Appendix 9.3.b), the data provided must show evidence that the frequency of the maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan. The recommendations for procedural modifications include: additions/changes to treatment plan to impact behaviors targeted for reduction. Procedural modifications should include one or more of the following: antecedent manipulation modifications, modifications of prompting procedures used in acquisition, modifications in consequence-based strategies – ones that either reduce maladaptive behavior or reinforce replacement behavior (e.g., manipulation or reinforcement schedules, switch to a different decelerative procedure), or if lack or progress was due to therapist error (e.g., poor data collection or poor training on intervention methods), how the provider will address human error. The recommendations are insufficient to support continued care.

Id.

6. On August 24, 2023, [REDACTED] requested a Fair Hearing on behalf of Petitioner based on the termination of BA services. *Id.* at 8. On September 29, 2023, the undersigned Hearing Officer issued a notice to the parties of record scheduling the Fair Hearing for October 13, 2023, at 9:00 a.m. EST. *Id.* at 8-19. Administrative approval was granted for continued care pending the outcome of the fair hearing. *Id.* at 19.

7. Dr. Hurley testified that eQHealth reviews behavior analysis cases to ensure that providers are giving quality care consistent with the standards enumerated in the BA Policy as well as professional medical standards of ABA. eQHealth reviewed the Treatment Plan submitted in this case to determine whether all five (5) conditions of medical necessity are met. Dr. Hurley asserted that Petitioner's services were terminated because the Treatment Plan is not consistent with generally accepted professional medical standards as determined by the Medicaid program.

8. Dr. Hurley established that an effective treatment plan is built around maladaptive behaviors (which decrease in frequency) and skills to be acquired (which increase in frequency) over the course of treatment. The effectiveness of a treatment plan is determined by reference to data, which is visually depicted in graphs showing a recipient's progress through treatment. Further, standards of care in the field of BA require an immediate intervention or modification of a treatment plan every time there is no progress after approximately 3 graph points or approximately 3-6 weeks of treatment. An intervention is shown by a vertical line on the data graph marking its start point so that a recipient's progress can be evaluated. Standard of care dictate that BA services must be effective or immediately modified to address a lack of progress.

9. Dr. Hurley established that the Treatment Plan does not show that the frequency of Petitioner's maladaptive behaviors has decreased over the course of treatment. The data graphs

for [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], and [REDACTED] are essentially “flat” lines showing no progress and no immediate modification or intervention after 3 data points, or approximately 3 weeks of treatment, to address Petitioner’s lack of progress. *Id.* at 271-279, 287-300. Therefore, according to Dr. Hurley, the Treatment Plan does not meet standards of care in the field of ABA and is not effective treatment. With regard to the data graphs for Petitioner’s replacement behaviors, Dr. Hurley established that the behaviors targeted for improvement have worsened over the course of treatment, and no modifications or interventions were made to change Petitioner’s trajectory. *Id.* at 292. Dr. Hurley also established that caregiver training, added at reconsideration, should include random checks to ensure the accuracy of data collection and that group home staff are adhering to the Treatment Plan. Based on the documentation provided and ineffectiveness of the Treatment Plan, Dr. Hurley opined that Petitioner would not gain any additional benefit from continuing treatment under the Treatment Plan at issue.

10. [REDACTED] testified that Petitioner needs behavior analysis services and that she is considering changing providers so that Petitioner can receive effective treatment.

CONCLUSIONS OF LAW

11. The Agency’s Office of Fair Hearings has jurisdiction over the subject matter of this proceeding and the parties pursuant to section 409.285(2), Florida Statutes (2019). This order is the final administrative decision of AHCA under section 409.285(2)(a).

12. This hearing was held as a *de novo* proceeding pursuant to Rule 59G-1.100(17)(b), Florida Administrative Code (“F.A.C.”).

13. Because Respondent terminated a previously approved service, Rule 59-1.100(17)(g), F.A.C. assigns the burden of proof to the Respondent. The standard of proof in an administrative hearing is a preponderance of the evidence. The preponderance of the evidence standard requires proof by “the greater weight of the evidence” (Black’s Law Dictionary at 1201, 7th Ed.).

14. States must provide Early and Periodic Screening, Diagnostic, and Treatment (“EPSDT”) services to Medicaid-eligible children under age 21 when requested under the Medicaid state plan. *See* 42 U.S.C. § 1396a(a)(43); 42 U.S.C. § 1396d(a)(4).

15. According to 42 U.S.C. § 1396d(r)(5), EPSDT services mean, in relevant part, the following items and services:

Such other necessary health care, diagnostic services, treatment, and other measures described in subsection (a) of this section to correct or ameliorate defects and physical and mental illness and conditions discovered by the screen services, whether or not such services are covered under the state plan.

16. A state may place medical necessity limitations on EPSDT services. *See* 42 C.F.R. §§ 440.230(a), (b), (d).

17. Section 409.905(2), Florida Statutes, limits EPSDT services with a medical necessity standard:

The [Agency] shall pay for early and periodic screening and diagnosis of a recipient under age 21 to ascertain physical and mental problems and conditions and all services determined by the agency to be medically necessary for the treatment, correction, or amelioration of these problems and conditions, including personal care, private duty nursing, durable medical equipment, physical therapy, occupational therapy, speech therapy, respiratory therapy, and immunizations.

18. The Florida Medicaid Definitions Policy, incorporated by reference in Fla. Admin. Code R. 59G-1.010, defines “Medically Necessary” or “Medical Necessity” as follows:

The medical or allied care, goods, or services furnished or ordered must meet the following conditions:

- Be necessary to protect life, to prevent significant illness or significant disability, or to alleviate pain
- Be individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness or injury under treatment, and not in excess of the patient’s needs
- Be consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational
- Be reflective of the level of service that can be safely furnished, and for which no equally effective and more conservative or less costly treatment is available statewide
- Be furnished in a manner not primarily intended for the convenience of the recipient, the recipient’s caretaker, or the provider

The fact that a provider has prescribed, recommended, or approved medical or allied care, goods, or services does not, in itself, make such care, goods or services medically necessary or a medical necessity or a covered service.

Respondent’s Composite Exhibit 2 at page 23.

19. The Behavior Analysis Services Coverage Policy (October 2017) (“BA Policy”), incorporated by reference in Rule 59G-4.125, F.A.C., governs BA services available under Florida Medicaid. The BA Policy provides as follows:

1.0 Introduction

Behavior analysis (BA) services are highly structured interventions, strategies, and approaches provided to decrease maladaptive behaviors and increase or reinforce appropriate behaviors.

...

4.0 Coverage Information

4.1 General Criteria

Florida Medicaid covers services that meet all of the following:

- Are determined medically necessary
- Do not duplicate another
- Meet the criteria as specified in this policy

Respondent’s Composite Exhibit 2 at page 40, 42.

20. Appendix 9.0 of the BA Policy provides Review Criteria for Behavior Analysis Services.

These Review Criteria state as follows:

Review Criteria for Behavior Analysis Services

Behavior analysis (BA) services are considered as either the treatment of choice or as an adjunct treatment modality for a variety of conditions and disorders where maladaptive behaviors are part of the recipient’s clinical presentation, including behavioral manifestations of diagnoses such as Autism Spectrum Disorder and other behavioral health conditions.

Critical Elements Necessary for ANY Type of Behavior Analysis Service:

The following critical elements **MUST** be satisfied to qualify for BA services:

- a. Eligibility – The recipient must meet all criteria for BA services as outlined in the Behavior Analysis Services Coverage Policy, Rule 59G-4.125, F.A.C.
- b. Medical necessity – The recipient must meet medical necessity criteria as outlined in Rule 59G-1.010, F.A.C.
- c. The recipient currently engages in maladaptive behaviors
- d. These maladaptive behaviors interfere with the recipient’s daily functioning

...

2. Criteria for Behavior Analysis Services and Reassessments – ALL of the following **MUST be satisfied:**

- a. **ALL** critical elements are met
- b. An assessment or, if applicable, a reassessment, authored by a lead analyst, is provided. An assessment of the maladaptive behavior(s) is a necessary element of the process of identifying the frequency and magnitude of the behaviors as well as the variables associated with the occurrence of the maladaptive behavior(s). This helps in defining what are the functional consequences of the problem behavior(s) so that an adequate behavior plan can be implemented. This (re)assessment **MUST** include, at a minimum, **ALL** of the following:
- c. A behavior plan authored or updated by a lead analyst. The behavior plan is the cornerstone of the delivery of behavior analysis services and it is based on the information obtained in the assessment. It proposes specific interventions to reduce or eliminate the maladaptive behavior. These interventions take into consideration the variables, both present before the behavior, as well as after the behavior, that influence the occurrence of the maladaptive behavior(s). This plan also includes replacement appropriate behaviors for the recipient to engage in instead of the maladaptive behaviors in order to obtain the same function. The plan must be detailed enough to warrant the requested

services and include mechanisms to monitor its effectiveness. This **MUST** include, at a minimum, **ALL** of the following:

- i. Observable and measurable descriptions of the maladaptive behavior(s)
- ii. Identified function of the maladaptive behavior(s) behavior as a result of the assessment or reassessment conducted
- iii. Goals and strategies for changing the maladaptive behavior(s)
- iv. Written detailed description of when, where, and how often these goals will be addressed and proposed strategies will be implemented
- v. System for monitoring and evaluating the effectiveness of the plan
- vi. Safety and crisis plan, if applicable
- vii. Summary and recommendations
- viii. Discharge criteria
- ix. Transition plan (if applicable)

NOTE: Although the assessment and behavior plan were addressed separately in section 2, both of them can be submitted as a single document.

3. Criteria for Continuation of Treatment at the Present Level and/or Using Current Methods: Providers must ensure that ALL of the following criteria are met to request continuation of treatment at the present level or using the current methods. If criteria for 3a is met, but criteria for 3b and/or 3c are not met, then a reduction of the treatment level and/or change of treatment methods may be warranted.

- a. ALL criteria listed in 2a, 2b, and 2c regarding critical elements, assessment or reassessment, and behavior plan, are met.
- b. The data provided must show evidence that the frequency of the maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan.
- c. The level of functional impairment justifies continuation of BA services. The reviewer utilizes the information provided below as a guide as it relates to the level of functional impairment as expressed through the following behaviors:
 - i. Safety - aggression, self-injury, property destruction, elopement
 - ii. Communication - problems with expressive/receptive language, poor understanding or use of non-verbal communications, stereotyped, repetitive language Self-stimulating, abnormal, inflexible, or intense preoccupations
Self-care - difficulty recognizing risks or danger, grooming, eating, or toileting
 - iii. Other- behaviors not identified above

...

5. Criteria for Discharge from Behavior Analysis Services - ONE or MORE of the following **MUST** be satisfied:

- a. The critical elements are **no longer met**.
- b. The data provided shows that the frequency and severity of maladaptive behavior(s) has declined to the point that they no longer pose a barrier to the child's ability to function in his/her environment.
- c. The data provided shows the recipient has made no progress toward any goals in the last 12 consecutive months.
- d. The level of functional impairment as expressed through behaviors no longer justifies continued BA services.
- e. Parent/guardian withdraws consent for treatment.

Respondent's Composite Exhibit 2 at pages 45-47.

21. The Florida Medicaid Authorization Requirements Policy ("Authorization Requirements Policy") (June 2016), incorporated by reference in Rule 59G-1.053, F.A.C., provides general requirements for providers to obtain authorization to render Florida Medicaid services. The Authorization Requirements Policy states, in pertinent part:

3.0 Determination Process

3.1 Review Criteria

The QIO may use a national standardized set of criteria, or other set of criteria, approved by AHCA, as a guide for authorizations performed at the first review level. If services cannot be approved at the first level review, the QIO's physician peer reviewer will determine medical necessity using his or her clinical judgment, acceptable standards of care, state and federal laws, and AHCA's medical necessity definition.

3.2 Review Process

The QIO will review each authorization request and will approve, deny, or request additional information. The QIO may deny a portion of the requested units of service if it cannot substantiate medical necessity based upon the information submitted.

3.2.1 Continued Authorization Requests

The QIO shall not deny or reduce the amount, frequency, or duration of a service that is already being provided, unless:

- The reduction is to correct for factual errors or omissions in prior certifications.
- There is a documented improvement in the recipient's medical condition.
- There is a documented change in the recipient's circumstances.

- The reviewing physician determines the recipient will not gain any additional benefit by continuing services at the current level.

Respondent's Composite Exhibit 2 at pages 32-34.

22. In this case, Respondent terminated Petitioner's BA services. The NOO and NRD explained that Petitioner's request for continuation of services did not meet medical necessity as the treatment plan was not "[c]onsistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational." *See supra* ¶ 4-5.

23. As provided in the BA policy (Appendix 9.0, section (a)), and the EPSDT requirements, the recipient must meet the meet the medical necessity criteria as outlined in Fla. Admin. Code R. 59G-1.010. A component of medical necessity is that services must be "consistent with generally accepted professional medical standards." As outlined above, Dr. Hurley provided credible and persuasive testimony identifying several instances where the revised Treatment Plan did not follow generally accepted standards of BA. For example, the Treatment Plan does not show evidence that the frequency of Petitioner's maladaptive behaviors has decreased and does not show that there was a modification or intervention to address Petitioner's lack of progress. *See supra* ¶ 8-9. As Dr. Hurley testified, the data graphs for Petitioner's replacement behaviors show that behaviors targeted for improvement have worsened, and no intervention was made to change Petitioner's trajectory. *See supra* ¶ 8-9. Thus, Respondent demonstrated that, based on the information in the record, the requested BA services are not "consistent with generally accepted professional medical standards." Because the services are not consistent with generally accepted professional medical standards, the critical element of medical necessity is not met and, as Dr. Hurley testified, Petitioner will not gain any additional benefit by continuing services at the current level. *See supra* ¶ 9.

24. In this case, Petitioner’s provider recommended the continuation of BA services. However, the fact that a provider has prescribed, recommended, or approved medical or allied care, goods, or services does not, in itself, make such care, goods or services medically necessary or a medical necessity or a covered service. See supra ¶ 18.

25. Accordingly, Respondent met their burden of proof to show that the requested BA services no longer meet medical necessity criteria. Looking at all the evidence relevant to the particular needs of Petitioner, the BA services at issue are not necessary to correct or ameliorate a defect or a physical and mental illness or condition.

26. Upon consideration of the testimony provided, Respondent’s Composite Exhibit 1, Respondent’s Composite Exhibit 2, and the applicable law and policies, the undersigned finds that Respondent proved by a preponderance of the evidence that Respondent’s termination of BA services was correct.

DECISION

Respondent’s termination of Behavior Analysis services is **AFFIRMED**. Petitioner’s appeal based on Respondent’s termination of Behavior Analysis services is **DENIED**.

DONE and **ORDERED** this 7th day of December 2023, in Tallahassee, Leon County, Florida.
