OFFICE OF FAIR HEARINGS

[REDACTED],

PETITIONER,

AHCA Case No.: 23-FH2336

vs.

AGENCY FOR HEALTH CARE
ADMINISTRATION,

RESPONDENT.

_____ /

FINAL ORDER

Pursuant to notice, the undersigned Hearing Officer convened a telephonic Fair Hearing on the instant case on December 13, 2023, at 9:00 EST.

APPEARANCES

For the Petitioner:

[REDACTED]

Petitioner's Authorized Representative

For the Respondent:

Sandra Durden
Medical Health Care Program Analyst
Agency for Health Care Administration

STATEMENT OF ISSUE

The issue is whether Respondent proved by a preponderance of the evidence that Respondent's decision to terminate Petitioner's behavior analysis ("BA") services was correct.

PRELIMINARY STATEMENT

All parties and witnesses appeared for the scheduled Fair Hearing telephonically. [REDACTED]

[REDACTED] (" [REDACTED]"), Petitioner's Authorized Representative and [REDACTED] appeared for the Fair Hearing on behalf of Petitioner, provided testimony. Arleidys Perez ("Ms. Perez"), BCBA with

[REDACTED]. (“provider”), appeared as a witness for Petitioner.

Sandra Durden, Medical Health Care Program Analyst for the Agency for Health Care Administration (“Agency” or “AHCA”), appeared for the Fair Hearing as the representative for Respondent. Dr. Alissa Conway (“Dr. Conway”), a Board-Certified Behavior Analyst at the doctoral level (“BCBA-D”) for eQHealth Solutions, appeared for the Fair Hearing as a witness for Respondent.

Interpreter Jorge, ID no. 223611 with Language Line Solutions, provided translation services for Petitioner.

Petitioner did not introduce any exhibits at the Fair Hearing. Prior to the Fair Hearing, Respondent filed with the Office of Fair Hearings and sent to Petitioner a one hundred and sixty (160)-page evidence packet. The evidence packet appears in the Office of Fair Hearings’ case management system as “[REDACTED] 11.14.2023 1-77.pdf,” “[REDACTED] 11.14.2023 78-111.pdf,” “[REDACTED] 11.14.2023 112-145.pdf,” and “[REDACTED] 11.14.2023 145-160.pdf.” Without objection, the evidence packet was admitted into evidence as Respondent’s Composite Exhibit 1.

Prior to the Fair Hearing, Respondent filed with the Office of Fair Hearings and sent to Petitioner a forty-nine (49)-page evidence packet. The evidence packet appears in the Office of Fair Hearings’ case management system as “23-FH2336 AHCA Evidence PKT.pdf.” Without objection, the evidence packet was admitted into evidence as Respondent’s Composite Exhibit 2.

FINDINGS OF FACT

1. Petitioner receives Medicaid services on a fee-for-service basis from the Agency. See Respondent’s Composite Exhibit 1 at page 21. eQHealth is a Quality Improvement Organization contracted by the Agency to review prior authorization requests for services. See Respondent’s Composite Exhibit 2 at page 2.

2. Petitioner is [REDACTED] and diagnosed with [REDACTED]. See Respondent’s Composite Exhibit 1 at page 21. The Applied Behavior Analysis Reassessment (“Treatment “Plan”) at issue identified the following maladaptive behaviors: [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED]. *Id.* at 117-124.

3. Petitioner requested the continuation of the following BA services: 3,120 units of code 17153, 104 units of code 97156, and 208 units of code 97155 for the certification period of August 25, 2023, through February 20, 2024. *Id.* at 24.

4. On August 23, 2023, Respondent issued a Notice of Outcome (“NOO”), terminating Petitioner’s BA services. *Id.* at 27-29. The NOO explained the basis for the termination as follows:

[T]he requested services are not medically necessary under the following standard(s):

Consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational.
Individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness under treatment, and not in excess of the patient’s needs.

...

The NOO further provided:

Requested services are denied because documentation is neither showing [i]mprovement nor support for maintenance.

PR Clinical Rationale – Denial: According to the Florida Medicaid State Plan (Appendix 9.3.b), the data provided must show evidence that the frequency of the

maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan. The recommendations for procedural modifications include: additions/changes to treatment plan to impact behaviors targeted for reduction. Procedural modifications should include one or more of the following: antecedent manipulation modifications, modifications of prompting procedures used in acquisition, modifications in consequence-based strategies – ones that either reduce maladaptive behavior or reinforce replacement behavior (e.g., manipulation or reinforcement schedules, switch to a different decelerative procedure), or if lack of progress was due to therapist error (e.g., poor data collection or poor training on intervention methods), how the provider will address human error. The provider has not addressed the lack of progress during the last observation period and did not amend the treatment plan in relation to the lack of progress. The information submitted does not meet standards of care within the field of behavior analysis. Additionally, [a]ccording to (the Florida Behavior Analysis Services Coverage Policy, page 6, 9.2.i), the behavioral definitions must be clear, complete, objective and free of unobservable intentional states. The behaviors should have clear boundaries, definite on-sets and off-sets, should not overlap with other target behaviors definitions, and not be a listing of behaviors that the recipient does not [engage] in. The behavior definitions for “ [REDACTED] ”; and all definitions lack clear onset/offset, in this treatment plan do not confirm to generally accepted standards of care within the field of applied behavior analysis. Additionally, [t]here are behaviors listed for decrease and goals for increase that do not meet medical necessity criteria. All goals must significantly interfere with normal functioning by threatening access to typical environments and negatively affectsactivities of daily living. As written, the goal for [REDACTED] does not meet medical necessity. This request is denied.

Id. at 28.

5. On August 29, 2023, Petitioner requested reconsideration of the Respondent’s decision.

Id. at 39. On September 15, 2023, Respondent issued a Notice of Reconsideration Determination (“NRD”) upholding its decision. *Id.* at 39-40. The NRD states, in pertinent part as follows:

Specifically the services must be:

Consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational.
Individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness under treatment, and not in excess of the patient’s needs.

...

PR Recon Determination: Provider did not remove facial tic (eye blinking). This behavior is outside the scope of ABA practice. The modifications to address the lack of progress included a sensory strategy ([REDACTED]). At reconsideration all documents were carefully reviewed. [REDACTED] [REDACTED], [REDACTED] are not an empirically supported procedures within the conceptual system of behavior analysis for treating the functions of maladaptive behavior of children with [REDACTED]. According to Behavior Analysis Services Coverage Policy (page-6-7), treatment that does not meet generally accepted standards of care within the field of applied behavior analysis are not covered under the behavior analysis service coverage policy. According to the Florida Medicaid State Plan (Appendix 9.3.b), the data provided must show evidence that the frequency of the maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan. The recommendations for procedural modifications include: additions/changes to treatment plan to impact behaviors targeted for reduction. Procedural modifications should include one or more of the following: antecedent manipulation modifications, modifications of prompting procedures used in acquisition, modifications in consequence-based strategies – ones that either reduce maladaptive behavior or reinforce replacement behavior (e.g., manipulation or reinforcement schedules, switch to a different decelerative procedure), or if lack of progress was due to therapist error (e.g., poor data collection or poor training on intervention methods), how the provider will address human error. The recommendations are insufficient to support continued care. This reconsideration request has been reviewed, reconsidered and the denial is upheld.

Id. at 40.

6. On September 13, 2023, [REDACTED] requested a Fair Hearing on behalf of Petitioner based on the termination of BA services. *Id.* at 8. On October 23, 2023, the undersigned Hearing Officer issued a notice to the parties of record scheduling the Fair Hearing for November 14, 2023, at 9:00 a.m. EST. *Id.* at 8. Administrative approval was granted for continued care pending the outcome of the Fair Hearing. *Id.* at 24.

7. Dr. Conway testified that eQHealth reviews behavior analysis cases to ensure that providers are giving quality care consistent with the standards enumerated in the BA Policy as well as professional medical standards of applied behavior analysis (“ABA”). eQHealth reviewed

the Treatment Plan submitted in this case to determine whether all five (5) conditions of medical necessity are met. Dr. Conway asserted that Petitioner's services were terminated because the Treatment Plan does not meet two medical necessity criteria: consistent with generally accepted professional medical standards as determined by the Medicaid program; and individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness under treatment, and not in excess of the patient's needs.

8. Dr. Conway established that an effective treatment plan is built around maladaptive behaviors (which decrease in frequency) and skills to be acquired (which increase in frequency) over the course of treatment. The effectiveness of a treatment plan is determined by reference to data, which is visually depicted in graphs showing a recipient's progress through treatment. Further, standards of care in the field of BA require an immediate intervention or modification of a treatment plan every time there is no progress after approximately 3 graph points or approximately 3-6 weeks of treatment. An intervention is shown by a vertical line on the data graph marking its start point so that a recipient's progress can be evaluated. Standards of care dictate that BA services must be effective or immediately modified to address a lack of progress.

9. Dr. Conway established that Petitioner has been in BA therapy for [REDACTED] years and that the Treatment Plan does not show that the frequency of Petitioner's maladaptive behaviors has decreased over the course of treatment. The data graphs for [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], and [REDACTED] are essentially "flat" lines showing no progress and no immediate modification or intervention after 3 data points, or approximately 3 weeks of treatment, to address Petitioner's lack of progress. *Id.* at *Id.* at 117-124. The sudden decrease in maladaptive

behaviors during the observation is due to a partial collection of data for the week of [REDACTED], and not represent progress on maladaptive behaviors. *Id.* Therefore, according to Dr. Conway, the Treatment Plan does not meet standards of care in the field of ABA and is not effective treatment. With regard to the data graphs for Petitioner's replacement behaviors, Dr. Conway established that the behaviors targeted for improvement are also "flat lines" showing little or slow progress over the course of treatment, and no modifications or interventions were made to address Petitioner's lack of progress or rate of progress. *Id.* at 127-140. Dr. Conway also established that the Treatment Plan contains non-empirically supported procedures, internal states, and emotions that cannot be properly identified and reinforced, and are not consistent with standards of care in the field of ABA. The definition of [REDACTED] as a maladaptive behavior involving "[REDACTED]" does not meet standards of care in the field of ABA, the provider was asked to remove it, and the provider did not do so. *Id.* at 110. The offset of "[REDACTED]" to reduce the behavior also does not meet standards of care as it was not shown how the offset would treat [REDACTED]. Finally, Dr. Conway established that no progress was made on the majority of caregiver goals, *Id.* at 142, which remain at 50% or chance level. Based on the documentation provided and ineffectiveness of the Treatment Plan, Dr. Conway opined that Petitioner would not gain any additional benefit from continuing treatment under the Treatment Plan at issue.

10. Ms. Perez asserted that interventions were added to the Treatment Plan to address a lack of progress. She further asserted that a table was added in an effort to remove internal states. *Id.* at 109-110. Ms. Perez testified that Petitioner's maladaptive behaviors continue at a "3 high" intensity level. *Id.*

CONCLUSIONS OF LAW

11. The Agency's Office of Fair Hearings has jurisdiction over the subject matter of this proceeding and the parties pursuant to section 409.285(2), Florida Statutes (2019). This order is the final administrative decision of AHCA under section 409.285(2)(a).

12. This hearing was held as a *de novo* proceeding pursuant to Rule 59G-1.100(17)(b), Florida Administrative Code ("F.A.C.").

13. Because Respondent terminated a previously approved service, Rule 59-1.100(17)(g), F.A.C. assigns the burden of proof to the Respondent. The standard of proof in an administrative hearing is a preponderance of the evidence. The preponderance of the evidence standard requires proof by "the greater weight of the evidence" (Black's Law Dictionary at 1201, 7th Ed.).

14. States must provide Early and Periodic Screening, Diagnostic, and Treatment ("EPSDT") services to Medicaid-eligible children under age 21 when requested under the Medicaid state plan. *See* 42 U.S.C. § 1396a(a)(43); 42 U.S.C. § 1396d(a)(4).

15. According to 42 U.S.C. § 1396d(r)(5), EPSDT services mean, in relevant part, the following items and services:

Such other necessary health care, diagnostic services, treatment, and other measures described in subsection (a) of this section to correct or ameliorate defects and physical and mental illness and conditions discovered by the screen services, whether or not such services are covered under the state plan.

16. A state may place medical necessity limitations on EPSDT services. *See* 42 C.F.R. §§ 440.230(a), (b), (d).

17. Section 409.905(2), Florida Statutes, limits EPSDT services with a medical necessity standard:

The [Agency] shall pay for early and periodic screening and diagnosis of a recipient under age 21 to ascertain physical and mental problems and conditions and all services determined by the agency to be medically necessary for the treatment, correction, or amelioration of these problems and conditions, including personal care, private duty nursing, durable medical equipment, physical therapy, occupational therapy, speech therapy, respiratory therapy, and immunizations.

18. The Florida Medicaid Definitions Policy, incorporated by reference in Fla. Admin. Code R. 59G-1.010, defines “Medically Necessary” or “Medical Necessity” as follows:

The medical or allied care, goods, or services furnished or ordered must meet the following conditions:

- Be necessary to protect life, to prevent significant illness or significant disability, or to alleviate pain
- Be individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness or injury under treatment, and not in excess of the patient’s needs
- Be consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational
- Be reflective of the level of service that can be safely furnished, and for which no equally effective and more conservative or less costly treatment is available statewide
- Be furnished in a manner not primarily intended for the convenience of the recipient, the recipient’s caretaker, or the provider

The fact that a provider has prescribed, recommended, or approved medical or allied care, goods, or services does not, in itself, make such care, goods or services medically necessary or a medical necessity or a covered service.

Respondent’s Composite Exhibit 2 at page 23.

19. The Behavior Analysis Services Coverage Policy (October 2017) (“BA Policy”), incorporated by reference in Rule 59G-4.125, F.A.C., governs BA services available under Florida Medicaid. The BA Policy provides as follows:

1.0 Introduction

Behavior analysis (BA) services are highly structured interventions, strategies, and approaches provided to decrease maladaptive behaviors and increase or reinforce appropriate behaviors.

...

4.0 Coverage Information

4.1 General Criteria

Florida Medicaid covers services that meet all of the following:

- Are determined medically necessary
- Do not duplicate another
- Meet the criteria as specified in this policy

Respondent's Composite Exhibit 2 at page 40, 42.

20. Appendix 9.0 of the BA Policy provides Review Criteria for Behavior Analysis Services.

These Review Criteria state as follows:

Review Criteria for Behavior Analysis Services

Behavior analysis (BA) services are considered as either the treatment of choice or as an adjunct treatment modality for a variety of conditions and disorders where maladaptive behaviors are part of the recipient's clinical presentation, including behavioral manifestations of diagnoses such as Autism Spectrum Disorder and other behavioral health conditions.

Critical Elements Necessary for ANY Type of Behavior Analysis Service:

The following critical elements **MUST** be satisfied to qualify for BA services:

- a. Eligibility – The recipient must meet all criteria for BA services as outlined in the Behavior Analysis Services Coverage Policy, Rule 59G-4.125, F.A.C.
- b. Medical necessity – The recipient must meet medical necessity criteria as outlined in Rule 59G-1.010, F.A.C.
- c. The recipient currently engages in maladaptive behaviors
- d. These maladaptive behaviors interfere with the recipient's daily functioning

...

2. Criteria for Behavior Analysis Services and Reassessments – ALL of the following **MUST** be satisfied:

- a. **ALL** critical elements are met
- b. An assessment or, if applicable, a reassessment, authored by a lead analyst, is provided. An assessment of the maladaptive behavior(s) is a necessary element of the process of identifying the frequency and magnitude of the behaviors as well as the variables associated with the occurrence of the maladaptive behavior(s). This helps in defining what are the functional consequences of the problem behavior(s) so that an adequate behavior plan can be implemented. This (re)assessment **MUST** include, at a minimum, **ALL** of the following:

- c. A behavior plan authored or updated by a lead analyst. The behavior plan is the cornerstone of the delivery of behavior analysis services and it is based on the information obtained in the assessment. It proposes specific interventions to reduce or eliminate the maladaptive behavior. These interventions take into consideration the variables, both present before the behavior, as well as after the behavior, that influence the occurrence of the maladaptive behavior(s). This plan also includes replacement appropriate behaviors for the recipient to engage in instead of the maladaptive behaviors in order to obtain the same function. The plan must be detailed enough to warrant the requested services and include mechanisms to monitor its effectiveness. This **MUST** include, at a minimum, **ALL** of the following:
- i. Observable and measurable descriptions of the maladaptive behavior(s)
 - ii. Identified function of the maladaptive behavior(s) behavior as a result of the assessment or reassessment conducted
 - iii. Goals and strategies for changing the maladaptive behavior(s)
 - iv. Written detailed description of when, where, and how often these goals will be addressed and proposed strategies will be implemented
 - v. System for monitoring and evaluating the effectiveness of the plan
 - vi. Safety and crisis plan, if applicable
 - vii. Summary and recommendations
 - viii. Discharge criteria
 - ix. Transition plan (if applicable)

NOTE: Although the assessment and behavior plan were addressed separately in section 2, both of them can be submitted as a single document.

3. Criteria for Continuation of Treatment at the Present Level and/or Using Current Methods: Providers must ensure that ALL of the following criteria are met to request continuation of treatment at the present level or using the current methods. If criteria for 3a is met, but criteria for 3b and/or 3c are not met, then a reduction of the treatment level and/or change of treatment methods may be warranted.

- a. ALL criteria listed in 2a, 2b, and 2c regarding critical elements, assessment or reassessment, and behavior plan, are met.
- b. The data provided must show evidence that the frequency of the maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan.
- c. The level of functional impairment justifies continuation of BA services. The reviewer utilizes the information provided below as a guide as it

relates to the level of functional impairment as expressed through the following behaviors:

- i. Safety - aggression, self-injury, property destruction, elopement
- ii. Communication - problems with expressive/receptive language, poor understanding or use of non-verbal communications, stereotyped, repetitive language Self-stimulating, abnormal, inflexible, or intense preoccupations Self-care - difficulty recognizing risks or danger, grooming, eating, or toileting
- iii. Other- behaviors not identified above

...

5. Criteria for Discharge from Behavior Analysis Services - ONE or MORE of the following **MUST**

be satisfied:

- a. The critical elements are **no longer met**.
- b. The data provided shows that the frequency and severity of maladaptive behavior(s) has declined to the point that they no longer pose a barrier to the child's ability to function in his/her environment.
- c. The data provided shows the recipient has made no progress toward any goals in the last 12 consecutive months.
- d. The level of functional impairment as expressed through behaviors no longer justifies continued BA services.
- e. Parent/guardian withdraws consent for treatment.

Respondent's Composite Exhibit 2 at pages 45-47.

21. The Florida Medicaid Authorization Requirements Policy ("Authorization Requirements Policy") (June 2016), incorporated by reference in Rule 59G-1.053, F.A.C., provides general requirements for providers to obtain authorization to render Florida Medicaid services. The Authorization Requirements Policy states, in pertinent part:

3.0 Determination Process

3.1 Review Criteria

The QIO may use a national standardized set of criteria, or other set of criteria, approved by AHCA, as a guide for authorizations performed at the first review level. If services cannot be approved at the first level review, the QIO's physician peer reviewer will determine medical necessity using his or her clinical judgment, acceptable standards of care, state and federal laws, and AHCA's medical necessity definition.

3.2 Review Process

The QIO will review each authorization request and will approve, deny, or request additional information. The QIO may deny a portion of the requested units of service if it cannot substantiate medical necessity based upon the information submitted.

3.2.1 Continued Authorization Requests

The QIO shall not deny or reduce the amount, frequency, or duration of a service that is already being provided, unless:

- The reduction is to correct for factual errors or omissions in prior certifications.
- There is a documented improvement in the recipient's medical condition.
- There is a documented change in the recipient's circumstances.
- The reviewing physician determines the recipient will not gain any additional benefit by continuing services at the current level.

Respondent's Composite Exhibit 2 at pages 32-34.

22. In this case, Respondent terminated Petitioner's BA services. The NOO and NRD explained that Petitioner's request for continuation of services did not meet medical necessity criteria as the Treatment Plan was not "[c]onsistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational" and "[i]ndividualized, specific, and consistent with symptoms or confirmed diagnosis of the illness under treatment, and not in excess of the patient's needs." See supra ¶ 4-5.

23. As provided in the BA policy (Appendix 9.0, section (a)), and the EPSDT requirements, the recipient must meet the meet the medical necessity criteria as outlined in Fla. Admin. Code R. 59G-1.010. A component of medical necessity is that services must be "consistent with generally accepted professional medical standards" and "[i]ndividualized, specific, and consistent with the confirmed diagnosis of the illness under treatment." As outlined above, Dr. Conway provided credible and persuasive testimony identifying several instances where the revised Treatment Plan did not follow generally accepted standards of BA. For example, after ■ years of BA treatment with the provider, the Treatment Plan does not show evidence that the frequency of

Petitioner's maladaptive behaviors has decreased and does not show that there was a modification or intervention to address Petitioner's lack of progress. See supra ¶ 8-9. As Dr. Conway testified, the data graphs for Petitioner's replacement behaviors show that behaviors targeted for improvement also do not show improvement, and no intervention was made to change Petitioner's lack of or slow progress. See supra ¶ 8-9. Further, the definition of [REDACTED] as a maladaptive behavior involving "[REDACTED]" does not meet standards of care in the field of ABA, the provider was asked to remove it, and the provider did not do so. The offset of "[REDACTED]" to reduce [REDACTED] also does not meet standards of care as it was not shown how the offset would treat the behavior. Finally, Dr. Conway established that no progress was made on the majority of caregiver goals which remain at 50% or chance level after [REDACTED] years of BA treatment. Thus, Respondent demonstrated that, based on the information in the record, the requested BA services are not "consistent with generally accepted professional medical standards" and are not "individualized, specific, and consistent with the illness under treatment." Accordingly, the critical element of medical necessity is not met and, as Dr. Conway testified, Petitioner will not gain any additional benefit by continuing services at the current level. See supra ¶ 9.

24. In this case, Petitioner's provider recommended the continuation of BA services. However, the fact that a provider has prescribed, recommended, or approved medical or allied care, goods, or services does not, in itself, make such care, goods or services medically necessary or a medical necessity or a covered service. See supra ¶ 18.

25. Accordingly, Respondent met their burden of proof to show that the requested BA services no longer meet medical necessity criteria. Looking at all the evidence relevant to the

particular needs of Petitioner, the BA services at issue are not necessary to correct or ameliorate a defect or a physical and mental illness or condition.

26. Upon consideration of the testimony provided, Respondent's Composite Exhibit 1, Respondent's Composite Exhibit 2, and the applicable law and policies, the undersigned finds that Respondent proved by a preponderance of the evidence that Respondent's termination of BA services was correct.

DECISION

Respondent's termination of Behavior Analysis services is **AFFIRMED**. Petitioner's appeal based on Respondent's termination of Behavior Analysis services is **DENIED**.

DONE and ORDERED this 8th day of January 2024, in Tallahassee, Leon County, Florida.
