OFFICE OF FAIR HEARINGS

[REDACTED]

PETITIONER,

AHCA Case No.: 23-FH2763

vs.

AGENCY FOR HEALTH CARE
ADMINISTRATION,

RESPONDENT.

_____ /

FINAL ORDER

Pursuant to notice, the undersigned Hearing Officer convened a telephonic Fair Hearing on the instant case on January 4, 2024, at 9:00 a.m., and January 24, 2024, at 1:00 p.m. EST.

APPEARANCES

For the Petitioner:

[REDACTED]

Petitioner's Authorized Representative

For the Respondent:

Sandra Durden
Medical Health Care Program Analyst
Agency for Health Care Administration

Linda Latson
Registered Nurse Specialist
Agency for Health Care Administration

STATEMENT OF ISSUE

The issue is whether Respondent proved by a preponderance of the evidence that Respondent's decision to terminate Petitioner's behavior analysis ("BA") services was correct.

PRELIMINARY STATEMENT

All parties and witnesses appeared telephonically. Petitioner's Authorized Representative and [REDACTED], [REDACTED] (" [REDACTED]"), appeared on behalf of the Petitioner.

Sandra Durden, Medical Health Care Program Analyst for the Agency for Health Care Administration ("Agency" or "AHCA"), appeared on behalf of Respondent at the January 4, 2024, hearing. Linda Latson, Registered Nurse Specialist for AHCA, appeared on behalf of Respondent at the January 24, 2024, hearing. Dr. Alissa Conway ("Dr. Conway"), BCBA at the Doctoral Level ("BCBA-D") for eQHealth Solutions, Inc. ("eQHealth"), attended as a witness for Respondent at both hearings.

Interpreter Avilene, #361179 with Language Line Solutions, provided Spanish translation services for Petitioner at the January 4, 2024, hearing. Interpreter Maria, #222766 with Language Line Solutions, provided Spanish translation services for Petitioner at the January 24, 2024, hearing.

Petitioner did not introduce any exhibits at the Fair Hearings.

Prior to the hearing, Respondent sent to the Office of Fair Hearings and Petitioner a two hundred and seventy-three (273)-page evidence packet. The packet appears in the Office of Fair Hearings' case management system as "[REDACTED] FH 01.04.2024 1-140.pdf," "[REDACTED] FH 01.04.2024 141-271.pdf," and "[REDACTED] FH 01.04.2024 272-273.pdf." Absent an objection from the Petitioner, the undersigned admitted the evidence packet into evidence as Respondent's Composite Exhibit 1.

Prior to the hearing, Respondent sent to the Office of Fair Hearings and Petitioner a forty-nine (49)-page evidence packet. The packet appears in the Office of Fair Hearings' case

management system as “23-FH2763 – AHCA EVIDENCE PKT.pdf.” Absent an objection from the Petitioner, the undersigned admitted the evidence packet into evidence as Respondent’s Composite Exhibit 2.

FINDINGS OF FACT

1. Petitioner receives Medicaid services on a fee-for-service basis from the Agency. See Respondent’s Composite Exhibit 1 at page 22. eQHealth is a Quality Improvement Organization contracted by the Agency to review prior authorization requests for services. See Respondent’s Composite Exhibit 2 at page 2.

2. As of the date of the Fair Hearing, Petitioner is [REDACTED] and diagnosed with [REDACTED]. See Respondent’s Composite Exhibit 1 at page 22. Dr. Conway established that Petitioner has participated in BA services with the current provider, [REDACTED], for more than [REDACTED]. *Id.* at 22, 29. The Behavior Analysis Assessment, dated September 22, 2023 (“Treatment Plan”), identified and targeted the following maladaptive behaviors: [REDACTED], [REDACTED], [REDACTED] (“[REDACTED]” and “[REDACTED]”), [REDACTED] ([REDACTED]), [REDACTED], [REDACTED] ([REDACTED]), [REDACTED], [REDACTED], [REDACTED], [REDACTED], and [REDACTED]. *Id.* at 174-175.

3. Petitioner requested the continuation of the following BA services: 2,600 units of code 97153, 208 units of code 97156, and 312 units of code 97155 for the certification period of October 71, 2023, through March 28, 2024. *Id.* at 24-25.

4. The Treatment Plan data graphs for maladaptive behaviors show the following lack of progress over the last authorization period: [REDACTED] and [REDACTED] remain at a rate of approximately [REDACTED] incidents per week at the start and end of the authorization period; [REDACTED]

remains at a rate of approximately [REDACTED] per week at the start and end of the authorization period; [REDACTED] ([REDACTED] and [REDACTED] ([REDACTED]) remain at a rate of approximately [REDACTED] per month and a rate of approximately [REDACTED] per month, respectively, from [REDACTED]; [REDACTED] remains at a rate of approximately [REDACTED] month at the start and end of the authorization period; [REDACTED] [REDACTED] and [REDACTED] [REDACTED] [REDACTED] show limited progress from approximately [REDACTED] incidents per week from the start to the end of the authorization period; [REDACTED] remains at approximately [REDACTED] per week at the start and the end of the authorization period; [REDACTED] occurred at a baseline level of [REDACTED] per week after [REDACTED] of BA services; and [REDACTED] occurred at a baseline level of [REDACTED] per week after [REDACTED] of BA services. *Id.* at 187 - 211.

5. On September 29, 2023, Respondent issued a Notice of Outcome (“NOO”), terminating Petitioner’s BA services. *Id.* at 28-30. The NOO explained the basis for the termination as follows:

[T]he requested services are not medically necessary under the following standard(s):

Consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational.

Individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness under treatment, and not in excess of the patient’s needs.

...

The NOO further provided:

Submitted information does not support the medical necessity for the requested frequency and/or duration.

Requested services are denied because documentation is neither showing [i]mprovement nor support for maintenance.

PR Clinical Rationale – Denial: Provider, there are caregiver goals listed that do not meet medical necessity criteria (data collection). All goals must include those to address recipient behaviors/skill deficits that significantly interfere with normal functioning by threatening access to typical environments and negatively affecting activities of daily living.

Provider, the recipient has been in services since [REDACTED]. The recipient show no progress across the majority of maladaptive behaviors and minimal progress in skill acquisition goals. Additionally, the skill acquisition graphs have inappropriate scales ending below 100% falsely depicting visual progress. According to the Florida Medicaid State Plan (Appendix 9.3.b), the data provided must show evidence that the frequency of the maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan. The recommendations for procedural modifications include: additions/changes to treatment plan to impact behaviors targeted for reduction. Procedural modifications should include one or more of the following: antecedent manipulation modifications, modifications of prompting procedures used in acquisition, modifications in consequence-based strategies – ones that either reduce maladaptive behavior or reinforce replacement behavior (e.g., manipulation or reinforcement schedules, switch to a different decelerative procedure), or if lack of progress was due to therapist error (e.g., poor data collection or poor training on intervention methods), how the provider will address human error. The provider has not addressed the lack of progress during the last observation period and did not amend the treatment plan in relation to the lack of progress. The information submitted does not meet standards of care within the field of behavior analysis. This request is denied.

Id. at 28-29.

6. Petitioner requested reconsideration of the Respondent’s decision. On November 1, 2023, Respondent issued a Notice of Reconsideration Determination (“NRD”) upholding its decision. *Id.* at 40-41. The NRD states, in pertinent part as follows:

Specifically the services must be:

Consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational.
Individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness under treatment, and not in excess of the patient’s needs.

...

PR Recon Determination: At reconsideration all documents were carefully reviewed. According to the Florida Medicaid State Plan (page 8, 6.2.3), the data

provided must show evidence that the frequency of the maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan. The recommendations for procedural modifications include: additions/changes to treatment plan to impact behaviors targeted for reduction. Procedural modifications should include one or more of the following: antecedent manipulation modifications, modifications of prompting procedures used in acquisition, modifications in consequence-based strategies – ones that either reduce maladaptive behavior or reinforce replacement behavior (e.g., manipulation or reinforcement schedules, switch to a different decelerative procedure), or if lack or progress was due to therapist error (e.g., poor data collection or poor training on intervention methods), how the provider will address human error. The provider has not addressed the lack of progress during the last observation period and did not amend the treatment plan in relation to the lack of progress or the proposed changes have little chance at improving behavior. The information submitted does not meet standards of care within the field of behavior analysis. The denial is upheld.

Id.

7. On October 30, 2023, Petitioner requested a Fair Hearing due to the termination of BA services. On December 13, 2023, the undersigned issued an Order Scheduling Fair Hearing by Telephone and Prehearing Instructions setting the hearing for January 4, 2024, at 9:00 a.m. After a continuance due to technical issues, the undersigned rescheduled the hearing for January 24, 2024, at 1:00 p.m. and all parties were notified. Administrative approval of continuation of benefits was granted pending the outcome of the Fair Hearing. *Id.* at 24.

8. At the Fair Hearing, Dr. Conway established that eQHealth reviews behavior analysis cases to ensure that providers are giving quality care consistent with the standards enumerated in the BA Policy as well as professional medical standards of applied behavior analysis (“ABA”). Three reviewers at eQHealth reviewed the Treatment Plan submitted in this case to determine whether all five (5) conditions of medical necessity are met. Dr. Conway asserted that Petitioner’s services were terminated because the Treatment Plan is not consistent with generally accepted

professional medical standards as determined by the Medicaid program and is not individualized and specific to Petitioner's needs.

9. Dr. Conway established that, according to standards of care in the field of ABA, each maladaptive behaviors should decrease over the certification period. She asserted that the Treatment Plan is ineffective as it does not show evidence that the frequency of each of Petitioner's maladaptive behaviors have decreased and does not show that there was a modification or intervention to immediately address Petitioner's lack of progress. *Id.* at 187 - 211. According to standards of care, a modification or intervention should be made when three data points on the data graph show no progress, and the provider made no modifications in this case. Dr. Conway asserted that the data graphs show that there has been little improvement on maladaptive behaviors and no interventions were made, after three data points of little to no progress, throughout the certification period to address the lack of progress. *Id.* As Dr. Conway established, an intervention should be shown by a vertical line on the data graph, marking the start point of the intervention, so that progress can be evaluated. *Id.* Therefore, according to Dr. Conway, the Treatment Plan does not meet standards of care in the field of ABA and has not been made specific and individualized to the Petitioner's needs to ensure that Petitioner progresses over treatment.

10. Referring to the data graphs for replacement behaviors in Petitioner's Treatment Plan, Dr. Conway established that, according to standards of care in the field of ABA, replacement behaviors should increase over the course of treatment if treatment is effective. In this case, none of Petitioner's replacement behaviors show clinically significant progress, and the provider did not implement any interventions to address the lack of progress. *Id.* at 226-250. Moreover,

Petitioner's progress does not reach above 50% or "chance" level. *Id.* In this case, the provider introduced new programs rather than addressing the lack of progress. Based on the documentation provided, Dr. Conway opined that Petitioner would not gain any additional benefit from continuing treatment under the proposed Treatment Plan at issue and that it would be detrimental to Petitioner to continue treatment with this provider's Treatment Plan.

11. [REDACTED] asserted that Petitioner is making progress on maladaptive behaviors. She testified concerning Petitioner's diagnosis and environmental changes that have affected Petitioner's progress.

CONCLUSIONS OF LAW

12. The Agency's Office of Fair Hearings has jurisdiction over the subject matter of this proceeding and the parties pursuant to section 409.285(2), Florida Statutes (2019). This order is the final administrative decision of AHCA under section 409.285(2)(a).

13. This hearing was held as a *de novo* proceeding pursuant to Fla. Admin. Code R. 59G-1.100(17)(b).

14. Because Respondent terminated a previously approved service, Fla. Admin. Code R. 59-1.100(17)(g) assigns the burden of proof to the Respondent. The standard of proof in an administrative hearing is a preponderance of the evidence. The preponderance of the evidence standard requires proof by "the greater weight of the evidence" (Black's Law Dictionary at 1201, 7th Ed.).

15. States must provide Early and Periodic Screening, Diagnostic, and Treatment ("EPSDT") services to Medicaid-eligible children under age 21 when requested under the Medicaid state plan. *See* 42 U.S.C. § 1396a(a)(43); 42 U.S.C. § 1396d(a)(4).

16. According to 42 U.S.C. § 1396d(r)(5), EPSDT services mean, in relevant part, the following items and services:

Such other necessary health care, diagnostic services, treatment, and other measures described in subsection (a) of this section to correct or ameliorate defects and physical and mental illness and conditions discovered by the screen services, whether or not such services are covered under the state plan.

17. A state may place medical necessity limitations on EPSDT services. *See* 42 C.F.R. §§ 440.230(a), (b), (d).

18. Section 409.905(2), Florida Statutes, limits EPSDT services with a medical necessity standard:

The [Agency] shall pay for early and periodic screening and diagnosis of a recipient under age 21 to ascertain physical and mental problems and conditions and all services determined by the agency to be medically necessary for the treatment, correction, or amelioration of these problems and conditions, including personal care, private duty nursing, durable medical equipment, physical therapy, occupational therapy, speech therapy, respiratory therapy, and immunizations.

19. The Florida Medicaid Definitions Policy (August 2017) (“Definitions Policy”), incorporated by reference in Fla. Admin. Code R. 59G-1.010, defines “Medically Necessary” or “Medical Necessity” as follows:

The medical or allied care, goods, or services furnished or ordered must meet the following conditions:

- Be necessary to protect life, to prevent significant illness or significant disability, or to alleviate pain
- Be individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness or injury under treatment, and not in excess of the patient’s needs
- Be consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational
- Be reflective of the level of service that can be safely furnished, and for which no equally effective and more conservative or less costly treatment is available statewide

- Be furnished in a manner not primarily intended for the convenience of the recipient, the recipient’s caretaker, or the provider

The fact that a provider has prescribed, recommended, or approved medical or allied care, goods, or services does not, in itself, make such care, goods or services medically necessary or a medical necessity or a covered service.

Respondent’s Composite Exhibit 2 at page 18.

20. The Florida Medicaid behavior Analysis services Coverage Policy (October 2017) (“BA Policy”), incorporated by reference in Fla. Admin. Code. R. 59G-4.125, governs BA services available under Florida Medicaid. The BA Policy provides as follows:

1.0 Introduction

Behavior analysis (BA) services are highly structured interventions, strategies, and approaches provided to decrease maladaptive behaviors and increase or reinforce appropriate behaviors.

...

4.0 Coverage Information

4.1 General Criteria

Florida Medicaid covers services that meet all of the following:

- Are determined medically necessary
- Do no duplicate another
- Meet the criteria as specified in this policy

Respondent’s Composite Exhibit 2 at page 40-41.

21. Appendix 9.0 of the BA Policy provides Review Criteria for Behavior Analysis Services.

These Review Criteria state as follows:

Review Criteria for Behavior Analysis Services

Behavior analysis (BA) services are considered as either the treatment of choice or as an adjunct treatment modality for a variety of conditions and disorders where maladaptive behaviors are part of the recipient’s clinical presentation, including behavioral manifestations of diagnoses such as Autism Spectrum Disorder and other behavioral health conditions.

Critical Elements Necessary for ANY Type of Behavior Analysis Service:

The following critical elements **MUST** be satisfied to qualify for BA services:

- a. Eligibility – The recipient must meet all criteria for BA services as outlined in the Behavior Analysis Services Coverage Policy, Rule 59G-4.125, F.A.C.
- b. Medical necessity – The recipient must meet medical necessity criteria as outlined in Rule 59G-1.010, F.A.C.
- c. The recipient currently engages in maladaptive behaviors
- d. These maladaptive behaviors interfere with the recipient's daily functioning

...

2. Criteria for Behavior Analysis Services and Reassessments – ALL of the following **MUST be satisfied:**

- a. **ALL** critical elements are met
- b. An assessment or, if applicable, a reassessment, authored by a lead analyst, is provided. An assessment of the maladaptive behavior(s) is a necessary element of the process of identifying the frequency and magnitude of the behaviors as well as the variables associated with the occurrence of the maladaptive behavior(s). This helps in defining what are the functional consequences of the problem behavior(s) so that an adequate behavior plan can be implemented. This (re)assessment **MUST** include, at a minimum, **ALL** of the following:
 - c. A behavior plan authored or updated by a lead analyst. The behavior plan is the cornerstone of the delivery of behavior analysis services and it is based on the information obtained in the assessment. It proposes specific interventions to reduce or eliminate the maladaptive behavior. These interventions take into consideration the variables, both present before the behavior, as well as after the behavior, that influence the occurrence of the maladaptive behavior(s). This plan also includes replacement appropriate behaviors for the recipient to engage in instead of the maladaptive behaviors in order to obtain the same function. The plan must be detailed enough to warrant the requested services and include mechanisms to monitor its effectiveness. This **MUST** include, at a minimum, **ALL** of the following:
 - i. Observable and measurable descriptions of the maladaptive behavior(s)
 - ii. Identified function of the maladaptive behavior(s) behavior as a result of the assessment or reassessment conducted
 - iii. Goals and strategies for changing the maladaptive behavior(s)
 - iv. Written detailed description of when, where, and how often these goals will be addressed and proposed strategies will be implemented
 - v. System for monitoring and evaluating the effectiveness of the plan
 - vi. Safety and crisis plan, if applicable

- vii. Summary and recommendations
- viii. Discharge criteria
- ix. Transition plan (if applicable)

NOTE: Although the assessment and behavior plan were addressed separately in section 2, both of them can be submitted as a single document.

3. Criteria for Continuation of Treatment at the Present Level and/or Using Current Methods: Providers must ensure that ALL of the following criteria are met to request continuation of treatment at the present level or using the current methods. If criteria for 3a is met, but criteria for 3b and/or 3c are not met, then a reduction of the treatment level and/or change of treatment methods may be warranted.

- a. ALL criteria listed in 2a, 2b, and 2c regarding critical elements, assessment or reassessment, and behavior plan, are met.
- b. The data provided must show evidence that the frequency of the maladaptive behavior(s) has decreased since the last review and, if not, that there is a modification of the behavior plan.
- c. The level of functional impairment justifies continuation of BA services. The reviewer utilizes the information provided below as a guide as it relates to the level of functional impairment as expressed through the following behaviors:
 - i. Safety - aggression, self-injury, property destruction, elopement
 - ii. Communication - problems with expressive/receptive language, poor understanding or use of non-verbal communications, stereotyped, repetitive language Self-stimulating, abnormal, inflexible, or intense preoccupations
Self-care - difficulty recognizing risks or danger, grooming, eating, or toileting
 - iii. Other- behaviors not identified above

...

5. Criteria for Discharge from Behavior Analysis Services - ONE or MORE of the following MUST

be satisfied:

- a. The critical elements are **no longer met**.
- b. The data provided shows that the frequency and severity of maladaptive behavior(s) has declined to the point that they no longer pose a barrier to the child's ability to function in his/her environment.
- c. The data provided shows the recipient has made no progress toward any goals in the last 12 consecutive months.
- d. The level of functional impairment as expressed through behaviors no longer justifies continued BA services.

- e. Parent/guardian withdraws consent for treatment.

Respondent's Composite Exhibit 2 at pages 45-46.

22. The Florida Medicaid Authorization Requirements Policy ("Authorization Requirements Policy") (June 2016), incorporated by reference in Fla. Admin. Code R. 59G-1.053, provides general requirements for providers to obtain authorization to render Florida Medicaid services.

The Authorization Requirements Policy states, in pertinent part:

3.0 Determination Process

3.1 Review Criteria

The QIO may use a national standardized set of criteria, or other set of criteria, approved by AHCA, as a guide for authorizations performed at the first review level. If services cannot be approved at the first level review, the QIO's physician peer reviewer will determine medical necessity using his or her clinical judgment, acceptable standards of care, state and federal laws, and AHCA's medical necessity definition.

3.2 Review Process

The QIO will review each authorization request and will approve, deny, or request additional information. The QIO may deny a portion of the requested units of service if it cannot substantiate medical necessity based upon the information submitted.

3.2.1 Continued Authorization Requests

The QIO shall not deny or reduce the amount, frequency, or duration of a service that is already being provided, unless:

- The reduction is to correct for factual errors or omissions in prior certifications.
- There is a documented improvement in the recipient's medical condition.
- There is a documented change in the recipient's circumstances.
- The reviewing physician determines the recipient will not gain any additional benefit by continuing services at the current level.

Respondent's Composite Exhibit 2 at pages 33.

23. In this case, Respondent terminated Petitioner's BA services. The NOO and NRD explained that Petitioner's request for continuation of services did not meet medical necessity as the treatment plan was not "[c]onsistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational" and

“[i]ndividualized, specific, and consistent with symptoms or confirmed diagnosis of the illness under treatment, and not in excess of the patient’s needs.” See supra ¶ 5-6.

24. As provided in the BA policy (Appendix 9.0, section (a)), and the EPSDT requirements, the recipient must meet the meet the medical necessity criteria as outlined in Fla. Admin. Code R. 59G-1.010. A component of medical necessity is that services must be “consistent with generally accepted professional medical standards.” As outlined above, Dr. Conway provided credible and persuasive testimony that the Treatment Plan did not follow generally accepted standards of BA. For example, the Treatment Plan does not show evidence that the frequency of Petitioner’s maladaptive behaviors has decreased over the last authorization period. See supra ¶ 4, 8-10. Also, the provider did not modify the Treatment Plan to immediately address Petitioner’s lack of progress based upon the data. See supra ¶ 4, 8-10. Further, with regard to replacement behaviors Dr. Conway’s testimony was persuasive that, according to standards of care in the field of ABA, replacement behaviors would increase over the course of effective treatment. See supra ¶ 10. In this case, none of Petitioner’s replacement behaviors show clinically significant progress, the provider did not implement any interventions to address the lack of progress, and Petitioner’s progress does not reach above 50% or “chance” level. *Id.* In this case, the provider introduced new programs rather than addressing the lack of progress. See supra ¶ 10. Thus, Respondent demonstrated that, based on the information in the record, the requested BA services are not “consistent with generally accepted professional medical standards” and they are not “individualized and specific” to the Petitioner. Therefore, the critical element of medical necessity is not met and, as Dr. Conway testified, the recipient will not gain any additional benefit by continuing services under the Treatment Plan at issue. See supra ¶ 10.

25. In this case, Petitioner’s provider recommended the continuation of BA services. However, the fact that a provider has prescribed, recommended, or approved medical or allied care, goods, or services does not, in itself, make such care, goods or services medically necessary or a medical necessity or a covered service. See supra ¶ 19.

26. Accordingly, Respondent met their burden of proof to show that the requested BA services no longer meet medical necessity criteria. Looking at all the evidence relevant to the particular needs of Petitioner, the BA services at issue in the Treatment Plan are not necessary to correct or ameliorate a defect or a physical and mental illness or condition.

27. Upon consideration of the testimony provided, Respondent’s Composite Exhibit 1, Respondent’s Composite Exhibit 2, and the applicable law and policies, the undersigned finds that Respondent proved by a preponderance of the evidence that Respondent’s termination of BA services was correct.

DECISION

Respondent’s termination of Behavior Analysis services is **AFFIRMED**. Petitioner’s appeal based on Respondent’s termination of Behavior Analysis services is **DENIED**.

DONE and **ORDERED** this 1st day of April 2024, in Tallahassee, Leon County, Florida.
